## Introduction

### Purpose

The purpose of this document is to describe the requirement specification for the web site “Making the World a Better Place”.

The intended audience for this document is two fold. First it is the contract between you and the client. Second it is for the developer of the site. Two primary goals are:

1. Client gets a very good understanding of what you will be delivering.
2. Developer has a very good understanding of what they are going to create.

The web site to be created is an informative site designed to be provide users with information on ways that they can help to make the world a better place

### Definitions, acronyms, and abbreviations

HTML – Hypertext markup language – used to define your content.

PHP – Personal Home Page – language that helps to customize html.

CSS – Cascading Style Sheets – used to define the look of a web site. W3

Validation – refers to both Html and CSS validation tool provided by the W3c.org. the html validator is located at: <http://validator.w3.org/> with the CSS validator located at: <http://jigsaw.w3.org/css-validator/>

## Overall Description

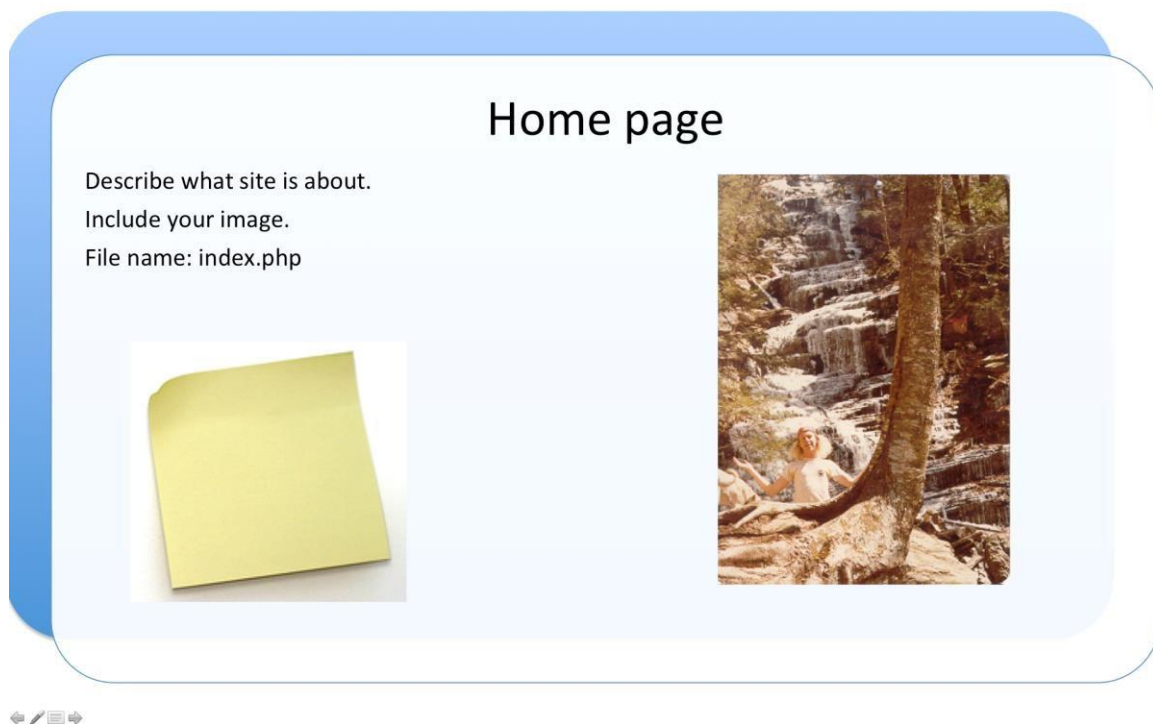

The world can be a crazy place. Climate change, crime and so many other things are affecting us all. Think about how it has affected you and what you can do to make the world a better place. I believe that working to improve always begins with

## Assignment requirements

1. all files will be located in the www-root/cs008 folder of your uvm Silk account. The assignment web page and the submit process will detail the exact location. Failure to have your site located in the correct folder by the due dates will result in a zero on the assignment. Be sure to pay attention to the lowercase letters.
2. You must submit this (and all) assignments by using the submit assignment link on the course web site. The grade cannot grade your assignment until you post and submit your assignment.
3. Be sure to create a sitemap.
4. All pages will pass W3C Html validation for html 5.
5. All pages will contain a proper title tag, Meta tags (author, character set and description).
6. CSS Validation – All pages will pass W3C 3.0 CSS validation.
7. CSS – all pages will have a linked style sheet. I am not going to require a specific set of rules but you will be graded on your effort of what you try (just having my sample gets you a zero).
8. Each page will have a minimum of 100 words not counting titles, lists or links. Be sure to use the correct elements to hold your content.
9. *Image* – Include a picture of yourself : ``
10. *Browser compatibility* - This site will be checked on Firefox, Safari, Chrome and Internet Explorer.
11. *File Names* – the main home page will be called index.php with the rest of the file names up to you (be sure to use .php).
12. *Specification Document (this file)*: must be updated and saved as a specs.pdf (must use pdf format and correct filename in the same folder to be graded).

## Specific requirements

1. *You fill out* – This is where you would put the exact detail of what you want for the assignment. For example (grader mark me wrong (c) for leaving bobs sample):
2. *Title for main page:*
3. *Meta Description:*
4. *Meta Character set:* UTF - 8
5. *Main page photo:*
6. *Content can be found here:*
7. I hope you get the idea. Leaving my sample text gets you marked wrong.
